BOARD INFINITY

Developing and The Redesign plan and SEO strategy.

Board Infinity Redesign Plan & Keyword Architecture

PROJECT BY: MOHAMMAD MAAZ ANSARI

Week 2-3

TASK: 1

Competitor Keyword Gap Analysis & Content Opportunity Matrix

Benchmarking *Board Infinity* vs. *UpGrad & Simplilearn* to Capture High-Intent Search Demand.

Target Persona: Aarav – The Career Switcher (Tier-2/3 Non-Tech Graduate, Seeking Tech Placement)

1. Executive Summary & Objective

Executive Overview: *Unlocking Uncaptured Organic Demand*

❑ Objective

Perform a rigorous SEO keyword gap analysis against primary market competitors (UpGrad, Simplilearn) using filtered Commercial & Transactional (C&T) Ubersuggest datasets.

❑ Core Insight

Board Infinity currently misses rankings for massive high-intent search terms (ranging from 9,900 to 135,000 monthly searches in India) that drive course enrolments and bootcamp leads for competitors.

❑ Strategic Goal

Map missed high-intent terms into dedicated content hubs to capture high-converting organic traffic, reduce dependence on paid ads (CAC: ₹8,500), and optimize the lead conversion funnel.

2. Competitor Keyword Gap Matrix

High-Intent Missed Keyword Opportunities (C&T Filtered)

Content Hub / Domain	High-Intent Missed Keyword	UpGrad Rank & URL Context	Simplilearn Rank & URL Context	Monthly Search Volume (Ind)	Strategic Action for Board Infinity
Digital Marketing Hub	digital marketing classes	Position #24 (/digital-marketing-courses/)	Position #27 (Organic Rank)	**135,000**	Re-architect core Digital Marketing landing page and metadata to capture high-volume transactional queries.
Data Science Hub	data science course	Position #18 (/data-science-course/)	Long-chain variants	**90,500**	Build a dedicated pillar landing page highlighting live cohort mentorship and verified placement outcomes.
Data Analytics Hub	data analytics courses	Long-tail blog match	Position #17 (SkillUp Hub)	**33,100**	Develop entry-level bridge content and free trial modules for career switchers like Aarav.
Software Engineering	course for full stack developer	Informational blog match	Position #6 (/full-stack-development-course)	**18,100**	Optimize Full-Stack Web Development hub page with explicit project portfolio outcomes.
Pricing & Intent Hub	digital marketing courses and fees	Position #9 (Fees Guide)	Position #7 (Cost Article)	**9,900**	Add transparent fee breakdowns and flexible EMI calculators above the fold to capture decision-stage searchers.

3. Strategic Recommendations & Action Plan

Content Strategy & Growth Implementation

❑ Establish Master Pillar Hubs:

- Re-architect core landing pages for Data Science, Digital Marketing, and Full-Stack Development.
- Address high-volume head keywords (*data science course, digital marketing classes*) currently dominated by UpGrad and Simplilearn.

❑ Capture Decision-Stage Pricing Queries:

Address fee-related intent (*digital marketing courses and fees – 9,900 Volume*) by integrating upfront pricing, flexible EMI options, and scholarship details above the fold.

❑ Establish Master Pillar Hubs:

Tailor landing page headlines (H1/H2s) to promise practical coding projects, 1-on-1 mentorship, and placement assistance to directly address confidence and career transition pain points.

TASK: 2

Hub-and-Spoke Intent Mapping Matrix

Content Architecture: Mapping Intent Keywords to Core Hubs

❑ Core Hub	❑ Primary Intent	❑ Target keywords	❑ Content Type
Hub 1: Data Hub (Data Science & Analytics)	**Transactional & Informational**	• *data science course* • *data analytics courses* • *classes in data analytics* • *python for data science*	Pillar bootcamp landing pages, structured curriculum guides, career bridge modules
Hub 2: Tech Hub (Software Development)	**Transactional & Practical**	• *full stack development course* • *course for full stack developer* • *software development bootcamp*	Technical program pages, project portfolio breakdowns, coding mentorship pages
Hub 3: Marketing Hub (Digital Marketing)	**Commercial & Decision-Stage**	• *digital marketing classes* • *digital marketing courses and fees* • *product management course*	Master marketing landing pages, transparent fee structure guides, EMI calculator sections

TASK: 3

Information Architecture (IA) Optimization

Streamlining Navigation & Removing Clutter from Top Bar

Current UI Clutter Audit

- Overcrowded global navigation bars featuring duplicate links, deep sub-menus, and low-priority pages (e.g., policy pages, redundant blog links) that dilute link juice and confuse career-switchers.

Streamlined IA Structure
(Hub-and-Spoke Model)

- **Primary Top Nav (Clean & Minimal):** Home | Programs (Mega-menu: Data, Tech, Marketing) | Success Stories | Corporate Training | Contact Us.
- **Footer & Secondary Nav (Relocated Items):** Shift policy documents, FAQs, resource hubs, and blog indexes to the footer to keep user focus anchored strictly on conversion paths.

Conversion Impact:

- Reduces cognitive load for the "Aarav" persona, lowers bounce rates, and shortens the click-depth required to reach core application and enrolment forms.

TASK: 4

Board Infinity Homepage Redesign – Wireframe Architecture

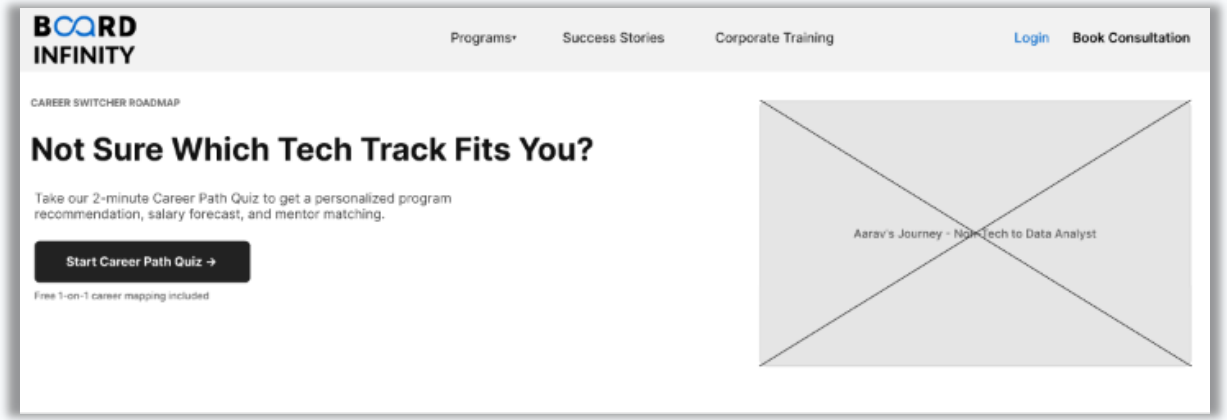

Reduce cognitive friction and maximize top-of-funnel lead captures via guided decision-making.

Target Persona: Aarav – The Career Switcher (Tier-2/3 Non-Tech Graduate, Seeking Tech Placement)

🔗 **Interactive Figma Lo-Fi Prototype:** [Click Here]

1. Hero Section & Strategic Value Proposition

Above-the-fold Engagement Strategy

❑ Clear Hierarchy:

High-contrast 38px headline addressing target domain confusion directly (***Not Sure Which Tech Track Fits You?***).

❑ Primary Conversion Engine:

High-visibility CTA driving traffic straight into the interactive Career Path Quiz.

❑ Visual Direction:

Low-fidelity monochrome grayscale palette (**#222222** primary elements, **#CCCCCC** wireframe indicators) using universal **Inter** typography.

❑ Social Proof & Context:

Embedded video placeholder ([**Video: Aarav's Journey**]) showing direct peer transformation to build trust instantly.

2. Interactive Career Path Quiz Overlay

Low-Barrier Interactive Lead Capture Model

❑ User Experience

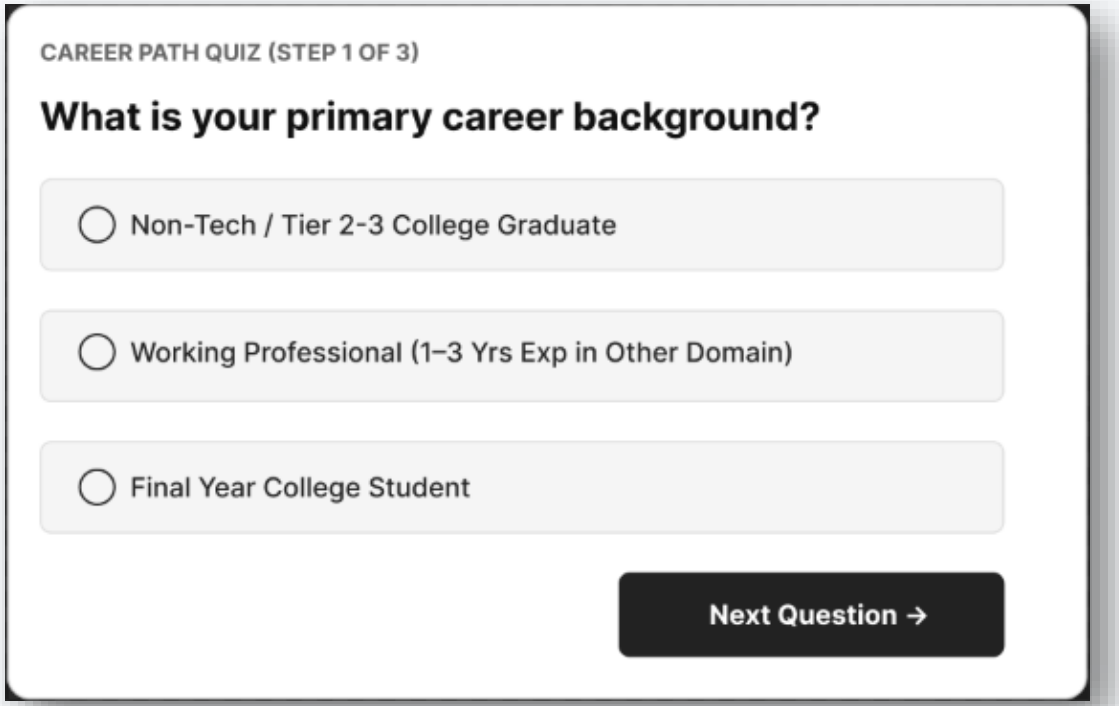

Opens as a clean, focused centered overlay on CTA click to minimize exit rate.

❑ Qualification Flow:

3-step structured background discovery (Non-Tech, Working Professional, Final Year Student) to personalize downstream program recommendations.

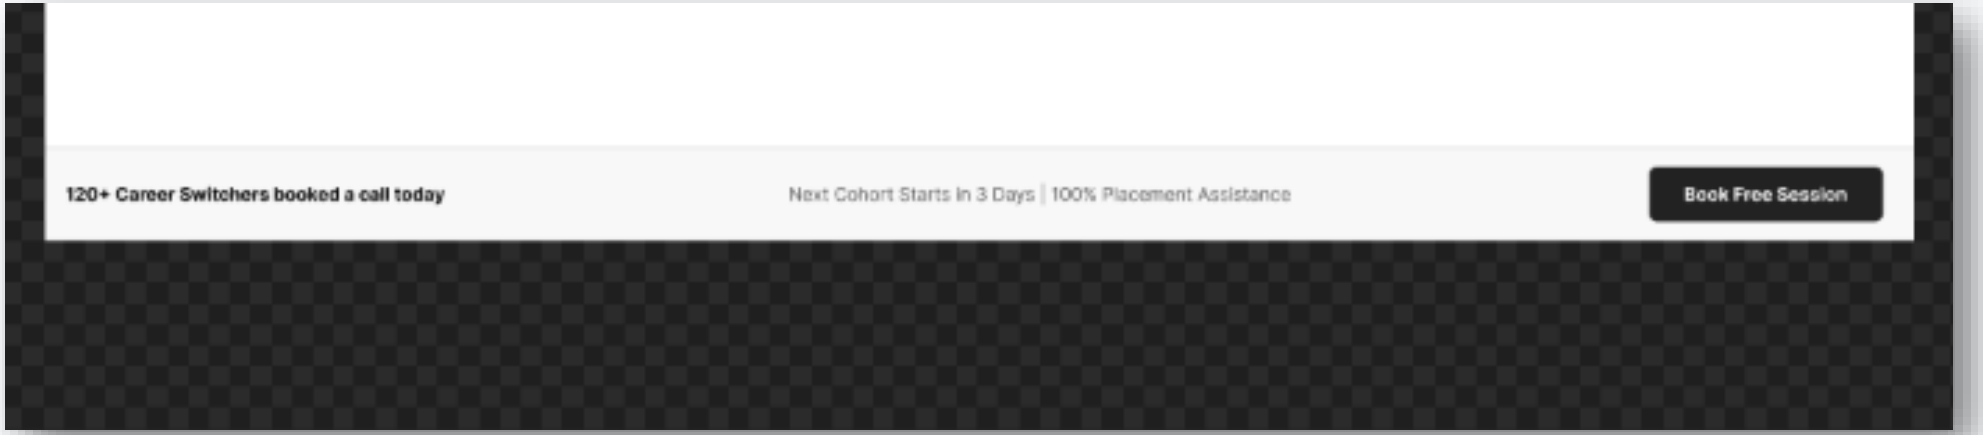

❑ Figma Implementation:

Integrated via Open Overlay prototype interactions with backdrop dimming for maximum visual focus.

3. Sticky Conversion Bar (Footer)

Scroll-Persistent Conversion Mechanism

❑ Placement

Fixed bottom positioning maintaining visibility across full-page vertical scroll.

❑ Triple-Driver Value

1. **Social Proof:** Real-time activity indicator (*120+ Switchers booked today*).
2. **Urgency Trigger:** Cohort countdown notice (*Next Cohort Starts in 3 Days*).
3. **Direct Action:** Persistent secondary CTA (*Book Free Session*) for high-intent visitors.

TASK: 5

Board Infinity Course Detail – Wireframe Architecture

Reduce cognitive friction and maximize top-of-funnel lead captures via guided decision-making.

Target Persona: Aarav – The Career Switcher (Tier-2/3 Non-Tech Graduate, Seeking Tech Placement)

🔗 **Interactive Figma Lo-Fi Prototype:** [Click Here]

1. Course Detail Page Overview & Layout Strategy

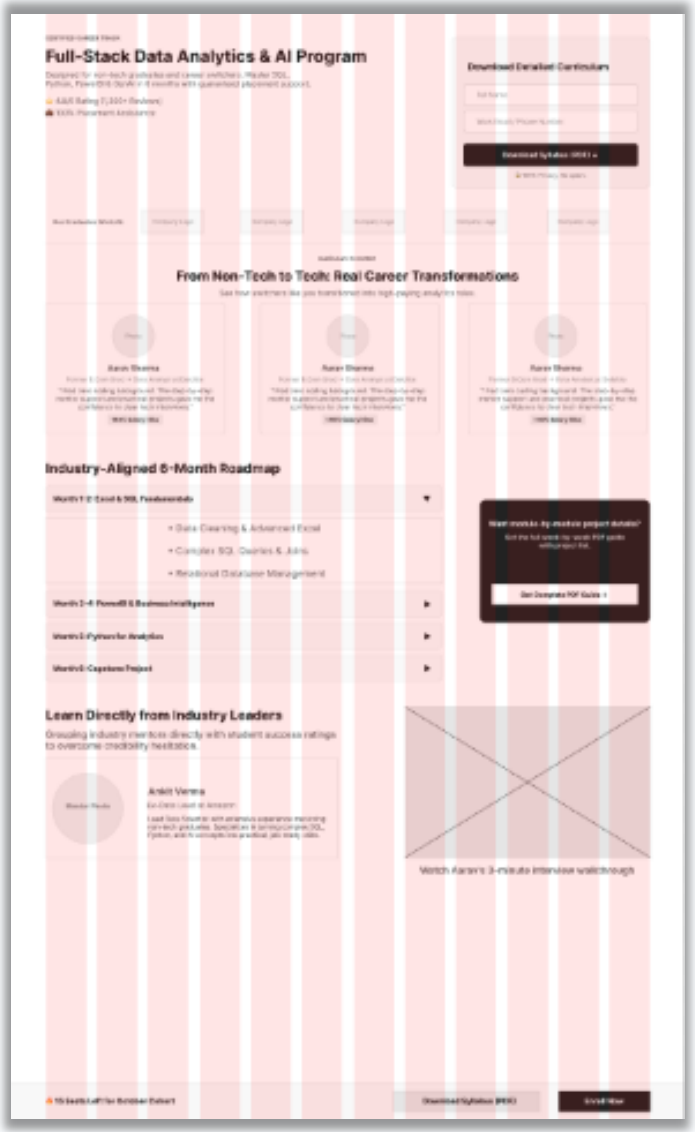

Course Detail page – Wireframe Architecture

❑ Key strategy and Goal

- **Optimized Testimonial Placement:** Early social proof integration to remove hesitation before the user scrolls.
- **Frictionless Lead Capture:** Dual syllabus download triggers to maximize lead conversions.

❑ Figma Grid and Specs

12-Column Desktop Layout Grid (1440px width, 80px margin, 24px gutter), monochrome wireframe theme.

2. Above-the-Fold & High-Converting Syllabus Lead Form

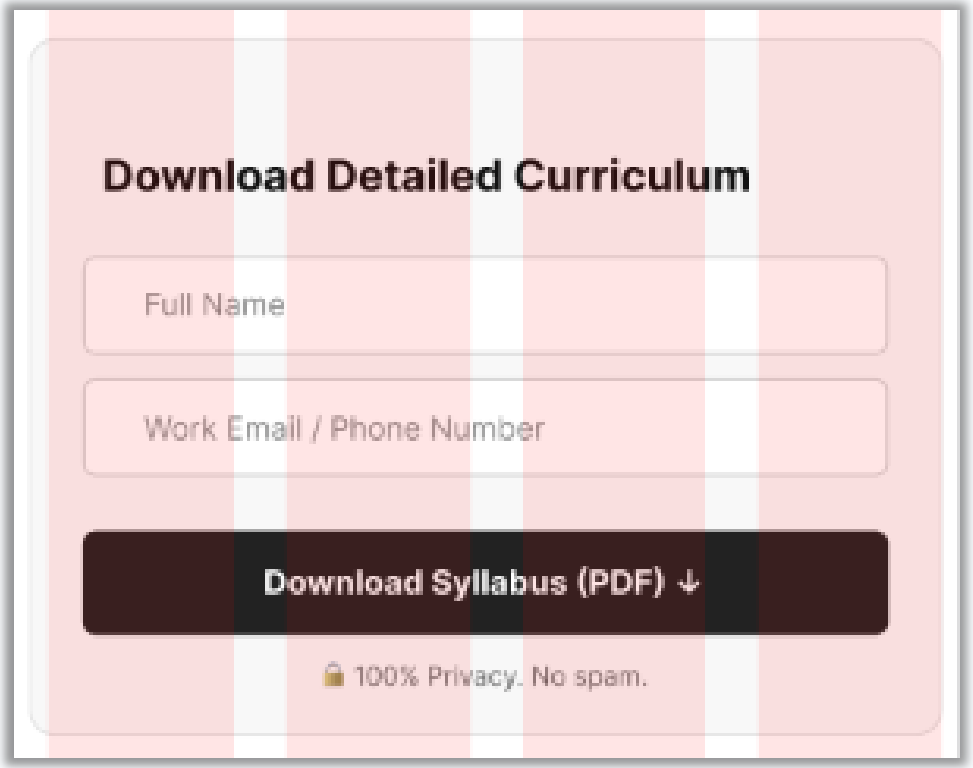

Above-the-Fold Hero & Direct Syllabus Download Gate

❑ Hero Messaging

High-contrast H1 headline (Full-Stack Data Analytics & AI Program) paired with trust badges (4.8/5 Rating, 100% Placement Assistance).

❑ Syllabus Download Card (Right Column):

- **Design Spec:** 420px card container (#F8F8F8 fill, 12px corner radius) with high-visibility CTA.
- **Value Proposition:** Direct 2-field form (Full Name + Email/Phone) for instant PDF access.
- **Micro-Trust:** Privacy reassurance micro-copy (🔒 100% Privacy. No spam.).

3. Strategic Testimonial Placement & Salary Hike Badges

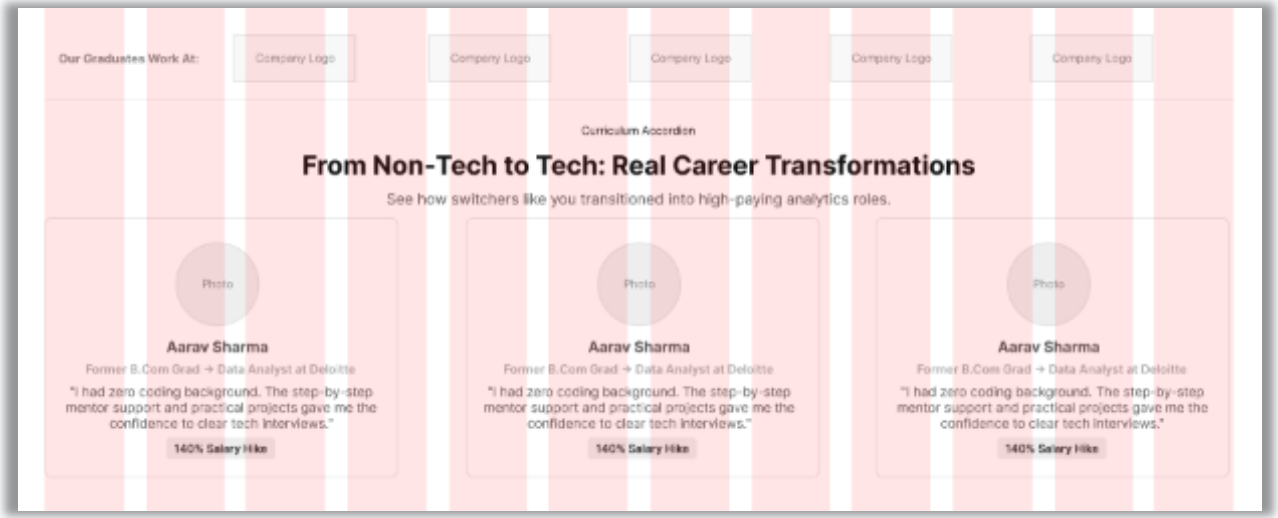

Early Social Proof Strategy: Peer Transformation

❑ Strategic Placement

Placed immediately below the hero logo bar (instead of page bottom) to establish early credibility for non-tech switchers like Aarav.

❑ Component Architecture (3-Card Grid):

- **Card Spec:** 380px cards with profile avatar, former-to-current transition tag (B.Com Grad → Data Analyst).
- **Salary Hike Badge:** High-impact highlighted tag (140% Salary Hike) placed inside #EEEEEE rounded pill elements (4px 8px padding).
- **Impact:** Direct peer validation reduces drop-off rates for hesitated visitors.

4. Interactive Module Roadmap & Sticky Lead Capture

Curriculum Transparency & Secondary Conversion Engine

❑ 2-Column Split Layout (70% / 30%):

- **Left Column (70% Accordion List):** Interactive month-by-month roadmap (Month 1-2: Excel & SQL in expanded state with bullet points; Months 3–6 in collapsed accordion states).
- **Right Column (30% Sticky Downloads Widget):** Dark contrast card (#222222 fill) providing a secondary CTA (Get Complete PDF Guide ↓) for users exploring the syllabus.

❑ Sticky Conversion Footer:

12-Column Desktop Layout Grid (1440px width, 80px margin, 24px gutter), monochrome wireframe theme.

Thank You
